History: Commercialization and Growth

LATEST SUBMISSION GRADE

100%

1. What institution agreed to be responsible for web standards in 1994?

1 / 1 point

- ☐ University of Michigan
- ☒ World-Wide-Web Consortium (W3C)
- ☐ Stanford
- ☐ Request-Response Congress (RRC)
- ☐ HTML Standards Organization (HSO)
- ☐ Cascading Style Sheets (CSS)
- ☐ CERN

✓ Correct

2. Between 1990 and 2006 the number of servers connected to the web grew from what to what?

1 / 1 point

- ☐ 1 server to 120 thousand servers
- ☒ 1 server to 120 million servers
- ☐ 2 servers to 500 million servers
- ☐ 100 servers to 10 billion servers

✓ Correct

3. What browser did Netscape ultimately turn into?

1 / 1 point

- ☐ Safari
- ☒ Firefox
- ☐ Chrome
- ☐ Internet Explorer

✓ Correct

4. How did the Mozilla foundation earn their money?

1 / 1 point

- ☐ When the heart-wrenching PBS special about Mozilla aired in 1996, donations poured in from all over the world.
- ☐ They patented AJAX applications and charged royalties to all the other browser manufacturers.
- ☐ They had several Class A IP addresses which they split up and auctioned them and sold them to the highest bidder.
- ☒ They added a search bar to their browser, and Google paid for the traffic directed to them.

✓ Correct

5. What web technology does Brendan Eich include as part of creating the capabilities we refer to as HTML5?

1 / 1 point

5. What web technology does Brendan Eich include as part of creating the capabilities we refer to as HTML5?

1 / 1 point

- ☒ Javascript
- ☐ PHP
- ☐ Ruby on Rails
- ☐ YouTube

✓ Correct

6. Why did JavaScript never fail in the beginning, as most new programming languages do?

1 / 1 point

- ☒ It was written to be malleable, allowing programmers to establish their own patterns and best practices.
- ☐ It was written by a team of 1000 computer scientists.
- ☐ It was carefully crafted over the course of several years before being released.
- ☐ They convened a conference with 100 computer scientists and had everyone vote on what features to include

✓ Correct

7. What was Mitchell Baker "fired" from Netscape for?

1 / 1 point

- ☐ For making the Netscape browser display a disrespectful pop-up message whenever it was viewing www.aol.com
- ☒ For repeatedly giving priority to the needs of the open source community over the needs of the commercial version of Netscape.
- ☐ For giving trade secrets to Microsoft
- ☐ Because she added several badly-designed tags (like blink) to HTML without approval

✓ Correct

8. What was Tim Berners Lee's goal with establishing web standards?

1 / 1 point

- ☐ To have total control over how programming for the web was done
- ☒ To prevent the proprietary Balkanization of the web
- ☐ To insure that Netscape would be able to control the future directions of the web
- ☐ To make sure that all web browsers were also editors

✓ Correct

9. Why did Jeff Bezos choose to start Amazon.com by selling books?

1 / 1 point

- ☒ Books are the category of items that have the most different products, making it impossible to have a brick and mortar store with the same level of inventory.
- ☐ Because Apple's iTunes store had already cornered the market for music tracks
- ☐ Because the ISBN number allowed each book to be broken into packets and routed across the network for remote printing
- ☐ Books were the easiest category of items to ship.
- ☐ Books were the easiest item to track because of their ISBN catalogue numbers.

✓ Correct
